The frost alarm goes off, the dew point is low and your best midnight helper is out sick.
OR

The frost alarm just went off at the orchard down the road – and the home ranch alarm just went off too. What place do I sacrifice to save the other?

Ever happened to you? If yes - then you know. You need a full time helper. Will never be sick, always on duty and never cares what time of night it is.

MEET

Command Center

View the status of all your wind machines from a phone or computer.

Alerts

Altrac alerts you to frost events and equipment issues with a text message or phone call.

Altrac is a new kind of helper. A frost alarm and a wind machine monitor. Will message you temperature & alarms and show if the machine is running or not.

Altrac Plus will stand watch at your machine – will send alerts for temperature and battery levels and will start or stop your machine. The Altrac program runs on computers, smart phones and smart devices. Will report if machine is on or off, alarms on temperature settings and wind machine low battery voltage. Even a Theft Alarm.

Adapts to most brands of wind machines in the field today.
